Art Unit: 1761

Upon reconsideration, and in view of the amendment filed 5/26/05, the following restriction requirement is made.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11,13-18, 25, and 26, drawn to a method of storing bananas, classified in class 426, subclass 419.
- II. Claims 19-24, drawn to packaged bananas, classified in class 426, subclass 415.

The inventions are distinct, each from the other because:

The invention claimed in Group II can be used in a method other than that recited in Group I. For example, the Invention of Group II does not require exposing the packaged bananas to two different controlled atmosphere steps. The product could be stored with or without one or more controlled atmosphere steps.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art requiring separate searches as shown by their different classification, restriction for examination purposes as indicated is proper.
